

Lab: Juggle Struggle

Goal

To experience the learning curve of a new hard skill.

What You Need

- 2 or 3 soft balls (socks work great).

Steps

1. The One Ball Toss

Throw ball from Left Hand to Right Hand. Make an arc (Rainbow). Easy? Good.

2. The Two Ball Exchange

Ball A in Left. Ball B in Right. Throw A. When A is *at the top*, Throw B underneath it. Catch A. Catch B. Do this 10 times. (Many drops will happen!).

3. The Three Ball Cascade (Impossible Mode)

Add the third ball. Just try. It will be chaos.

Discussion

- Did you get frustrated?
- Did your brain start to "understand" the pattern after a while?
- If you practiced for 1 year, could you do it? (Yes!).

What We Learned

Everything is impossible until it isn't. The bridge is Practice.
