

# Module 07: Communication — Teamwork

## Learning Objectives

1. Understand that **Teamwork** is when Agents work together.
2. Learn about **Shared Goals** (We all want to win).
3. Know that communication makes the team stronger than the individual.

## Introduction: The Ant Hill

One ant is small. One ant can't carry a hot dog. But 100 ants? They can move a mountain! Teams are like Ant Hills. When we communicate and help each other, we become a Super Organism.

## Key Concepts

### 1. The Pass (Sharing Data/Energy)

In soccer, you pass the ball. In conversation, you pass "the mic." Communication is moving information from Brain A to Brain B effectively. A good pass makes it easy for your teammate to score.

### 2. Coordination (Dancing Together)

Rowing a boat requires everyone to pull at the *exact same time*. If one person pulls early, the boat spins. Teamwork is about **Synchrony**. We move as ONE.

### 3. Trust (The Glue)

You have to trust that your teammate will do their job.

- The Quarterback trusts the Receiver to catch.
- The Trapeze Artist trusts the Catcher to catch. No Trust = No Team.

## Activities

### Activity 1: The Human Knot

Stand in a circle with your family/friends. Grab hands with two different people across the circle. Now... untangle the knot without letting go! You HAVE to communicate to solve the puzzle.

### Activity 2: Blindfold Obstacle Course

Set up pillows on the floor (Mines). Player A is blindfolded. Player B is the Navigator. Player B must use words to guide Player A safely across. "Step left... stop... big step forward!"

## Summary

Alone we can do so little; together we can do so much. A team is a System of Agents connected by Communication.
