

Course — Module 01 — Think About It

1. Where does the Internet live? (In servers and cables).
2. How does a message get from here to China in 1 second? (Light in fiber optics).
3. Why do we need passwords? (Keys to the digital house).
4. Is everything on the Internet true? (No! Verify your sources).
5. What happens if the Wi-Fi breaks? (The system disconnects).
6. Can a computer get sick? (Yes, a Virus).
7. Who owns the Internet? (No one person. It is decentralized).
8. Why do we call it a "Mouse"? (It looked like one).
9. What is a "Bug"? (A mistake in the code).
10. If you could send a message to everyone in the world, what would you say?
