

Lab: Communication Architecture Audit

Objectives

Learning Goal: Map information flows, identify model-alignment failures, and design improved communication architecture.

Part 1: Channel Inventory (10 min)

Channel	Type (Formal/ Informal)	Direction (Top-Down/ Bottom-Up/Lateral)	Cadence	Primary Function

Write your response here

Part 2: Model Alignment Assessment (15 min)

For each key organizational dyad, assess model alignment:

Team A ↔ Team B	Common Ground (H/M/L)	Key Misalignment	Impact
Engineering ↔ Sales			
Strategy ↔ Operations			
HR ↔ Business Units			
Finance ↔ Product			

Write your response here

Part 3: Signal Distortion Analysis (10 min)

Choose one important information flow and trace signal fidelity:

Signal: _____

Stage	Who	What They Receive	What They Pass On	What Changed
Origin				
Level 1				
Level 2				
Decision				

Write your response here

Part 4: Communication Redesign (20 min)

Propose three improvements to your organization's communication architecture:

1. **Add** (a new channel to address a gap):

Write your response here

1. **Remove** (an ineffective channel consuming resources):

Write your response here

1. **Modify** (improve an existing channel):

Write your response here

Summary

Component	Finding
Strongest communication channel	
Biggest model-alignment gap	
Most significant signal distortion	
Highest-priority redesign
