

Lab: Team System Health Assessment

Objectives

Learning Goal: Assess your team as a system — evaluate coherence, boundary management, and multi-scale alignment.

Part 1: Team Coherence Assessment (15 min)

Rate your team on each coherence dimension:

Dimension	Score (1-5)	Evidence/ Examples	Improvement Opportunity
Shared mental model			
Clear boundary (who's in, who's out)			
Joint attention			
Coordinated action			
Collective learning			
Overall coherence			

Write your response here

Part 2: Boundary Map (10 min)

Draw the team's boundary landscape:

Category	Names/Groups	Relationship to Team
Core members (always inside)		
Peripheral members (sometimes inside)		
Key external stakeholders		
Adjacent team (frequent interaction)		
Adjacent team (infrequent interaction)		

Permeability assessment: Is the boundary too open, too closed, or well-balanced?

Write your response here

Part 3: Multi-Scale Alignment (10 min)

Assess alignment between your team and the levels above and below:

Scale	Model Alignment	Information Flow Quality	Conflict/Tension
Individual → Team			
Team → Department			
Department → Organization			

Write your response here

Part 4: Intervention Design (15 min)

Based on your assessment, design one intervention for each weakness:

1. Lowest-scoring coherence dimension:

Write your response here

1. Boundary management improvement:

Write your response here

1. Multi-scale alignment gap:

Write your response here

Summary

Finding	Detail
Overall team coherence score	/5
Biggest strength	
Biggest vulnerability	
Priority intervention
