

Lab: Cross-Team Alignment Workshop Design

Objectives

Learning Goal: Design and prototype a cross-team alignment workshop for two teams that need to collaborate effectively.

Part 1: Select Team Pair (5 min)

Element	Detail
Team A	
Team B	
Shared deliverable / dependency	
Current quality of collaboration (1-5)	
Key pain point	

Write your response here

Part 2: Model Gap Analysis (10 min)

Dimension	Team A's Model	Team B's Model	Gap
Goal understanding			
Key priorities			
Vocabulary / jargon			
Success definition			
View of the other team			

Write your response here

Part 3: Design the Workshop (20 min)

Workshop Element	Design
Duration	
Participants (from each team)	
Pre-work (assignments before the workshop)	
Opening (ice-breaker / context-setting)	
Exercise 1 (mutual model sharing)	
Exercise 2 (joint problem-solving)	
Exercise 3 (commitment and action items)	
Output (boundary object to maintain alignment)	
Follow-up (how to sustain alignment)	

Write your response here

Part 4: Boundary Object Design (10 min)

Design one boundary object that both teams can use:

Element	Design
Type (dashboard, document, prototype, etc.)	
Content	
How Team A interprets it	
How Team B interprets it	
Update cadence	
Owner	

Write your response here

Summary

Component	Design Decision
Workshop format	
Key boundary object	
Follow-up mechanism	
Expected outcome
