

Lab: Dynamic Capabilities Assessment

Objectives

Learning Goal: Assess your organization's dynamic capabilities and design improvements to the competitive learning loop.

Part 1: Dynamic Capabilities Assessment (15 min)

Capability	Current Performance (1-5)	Evidence	Gap
Sensing (detecting threats/opportunities)			
Seizing (mobilizing to capture opportunities)			
Transforming (reconfiguring the organization)			

Write your response here

Part 2: Learning Loop Speed (10 min)

Loop Stage	Current Speed	Bottleneck?	Improvement
Sense market change		Y/N	
Update strategic model		Y/N	
Select new policy		Y/N	
Execute		Y/N	
Observe results		Y/N	
Total loop time			

Write your response here

Part 3: Experimentation Design (15 min)

Design one strategic experiment:

Element	Design
Assumption to test	
Experiment description	
Investment required	
Timeline	
Success criteria	
What you'll learn if it fails	

Write your response here

Part 4: Unlearning Assessment (10 min)

What Needs Unlearning	Why It Persists	Unlearning Strategy

Write your response here

Summary

Finding	Detail
Strongest dynamic capability	
Learning loop bottleneck	
Priority experiment	
Key unlearning challenge
