

Lab: AI Governance Framework Design

Objectives

Learning Goal: Design an AI governance framework for algorithmic decision-making in your organization.

Part 1: Algorithmic Decision Inventory (10 min)

Decision	Algorithm Type	Impact Level (H/M/L)	Current Governance	Gap

Write your response here

Part 2: Governance Framework Design (15 min)

For your highest-impact algorithmic decision:

Governance Element	Design	Implementation
Accountability	Who owns the decision?	
Transparency	How is the decision explained?	
Fairness	How is bias detected?	
Oversight	How are decisions reviewed?	
Appeal	How can affected parties contest?	

Write your response here

Part 3: Bias Testing Protocol (15 min)

Test	Methodology	Frequency	Action if Bias Found
Disparate impact			
Calibration across groups			
Feature importance audit			

Write your response here

Part 4: Organizational Readiness (10 min)

Readiness Factor	Current (1-5)	Needed (1-5)	Gap Closure Plan
Technical capability			
Legal/compliance knowledge			
Ethics awareness			
Stakeholder communication			

Write your response here

Summary

Finding	Detail
Highest-risk algorithmic decision	
Biggest governance gap	
Priority action
