

Course — Module 03 — Think About It

1. Why do your eyes hurt after staring at a screen? (Blue light strain).
2. How does a touchscreen know your finger is there? (Electricity in your skin!).
3. Why is 4K better than HD? (More pixels = sharper image).
4. Can you smell a picture of a flower? (No, screens only do Sight and Sound).
5. Why do animations look "fake"? (The physics isn't perfect).
6. What is Virtual Reality (VR)? (Tricking your brain into being somewhere else).
7. Why are notifications red? (Red means "Danger/Look Here" to the brain).
8. Do cats watch TV? (Sometimes, if the frame rate is high enough).
9. Is the person on TV really there? (No, it's light).
10. If you lived in a video game, what would you be?
