

Practice Quiz: Collective Intelligence — Module 08:

Planning

Name: ____ Date: ____

Part A: Multiple Choice

1. **Emergent strategy** (Mintzberg) is: A) A carefully planned strategy B) Strategy that arises from bottom-up patterns of local decisions rather than top-down planning C) A failed strategy D) A strategy that appears suddenly
2. Toyota's **A3 process** exemplifies: A) Top-down management B) Bottom-up intelligence — frontline workers proposing and implementing improvements through structured one-page documents C) Outsourced planning D) Automated planning
3. The **Delphi method** aggregates expert judgment through: A) Open debate B) Multiple rounds of anonymous expert input with feedback, reducing social pressure effects C) Voting D) Executive decision
4. **Backcasting** is valuable because it: A) Predicts the past B) Starts from a desired future state and works backward, overcoming anchoring on present conditions C) Uses hindsight D) Reverses decisions
5. Effective collective planning requires: A) Only executive input B) Diverse inputs, structured aggregation, iterative refinement, and clear decision rights C) Maximum democracy on every decision D) Eliminating all hierarchy
6. The gap between deliberate strategy and realized strategy reveals: A) Management failure B) The role of emergent strategy — the patterns that arose from distributed local decisions C) Nothing important D) Intentional deception

7. **Planning cells** (random employee groups deliberating on strategic issues) improve planning by: A) Reducing costs B) Incorporating perspectives and knowledge that executives may lack C) Following regulation D) Avoiding responsibility
-

Part B: Short Analysis

1. Your organization's formal strategy emphasizes "innovation" but actual resource allocation shows 95% going to maintaining existing products. Use the deliberate-vs-emergent strategy framework to diagnose this gap and propose methods to align realized strategy with stated strategy.
2. Design a participatory planning process for an organization of 200 people that must set strategic priorities for the next year. Specify pre-work, workshop structure, aggregation method, and how diverse inputs translate into concrete decisions.
3. A CEO believes that strategy should be set exclusively by the executive team and communicated downward. A VP argues that frontline insights are critical for strategy quality. Using concepts from this module (emergent strategy, bottom-up intelligence, participatory foresight), construct a balanced argument and propose a planning architecture that integrates both perspectives.
