

Lab: ML Model Governance Assessment

Objectives

Learning Goal: Assess your organization's ML maturity and design improvements to model governance and operations.

Part 1: ML Maturity Assessment (10 min)

Dimension	Current Level (1-5)	Evidence	Target
Data management			
Model development			
Deployment process			
Monitoring			
Retraining process			
Overall MLOps maturity			

Write your response here

Part 2: Model Inventory (15 min)

Model	Purpose	Last Retrained	Monitoring in Place?	Drift Risk (H/M/L)
			Y/N	

Write your response here

Part 3: Drift Monitoring Design (15 min)

For your highest-risk model:

Element	Design
Key metrics to monitor	
Drift detection method	
Alert thresholds	
Retraining trigger	
Rollback procedure	

Write your response here

Part 4: Feedback Loop Analysis (10 min)

Model	Feedback Loop Present?	Self-Reinforcing?	Mitigation
	Y/N	Y/N	

Write your response here

Summary

Finding	Detail
ML maturity level	
Highest drift risk model	
Priority MLOps improvement
