

Lab: The Maze Game

Goal

Help a paper agent find its way to a yummy treat at the end of a maze!

What You Need

- Paper (big piece is best!)
- Pencils or markers
- A small toy, button, or coin (this is your Agent)
- Crayons to decorate

Steps

1. Draw a Maze

Draw a simple maze on your paper.

- Draw a big **Start** circle on one side. Write "START" inside it.
- Draw a **Goal** star on the other side. Draw something yummy there (a cookie, a strawberry, a pizza slice!).
- Draw walls (thick lines) that the agent cannot walk through.
- Make sure there is at least one path from Start to Goal!

2. Name Your Agent

Give your toy a name and a goal. (Example: "This is Nibbles the Mouse. Her goal is to reach the cheese!")

3. Be the Agent

Put your toy on the Start circle. You are now the Agent's brain! Move your toy slowly along the paths.

- "Oh no! A wall!" -> Think: "Should I turn left or right?"
- "The path is clear!" -> Action: Move forward!
- "A dead end!" -> Surprise! Turn around and try a different way.

4. Reach the Goal

When your toy reaches the star, cheer! "Nibbles made it to the cheese!" Count how many turns you had to make.

5. Try Again

Can you find a shorter path? Move your agent again and see if there is a faster way!

My Agent Story

*

Write your response here

* My agent's name is: ____ My agent's goal was: ____ I had to make ____ turns. The hardest part was: ____

What We Learned

Question	My Answer
Did my agent reach the goal?	
How many wrong turns did I make?	
Did I find a shorter path the second time?	
What did my agent do when it hit a wall?
