

Lab: The Prediction Pal

Goal

Test your brain's power to predict the future!

What You Need

- A ball (or a crumpled piece of paper)
- A clear cup of water
- A coin

Steps

1. The Ball Drop

Hold the ball high up.

Event	My Prediction (What will happen?)	What Happened? (Result)
Drop a ball	It will fall down.	
Turn off switch	The light will go off.	
Push a car		

Were you right?

2. The Coin Flip

Look at the coin. Start flipping it.

- **Predict:** Will it be Heads or Tails?
- **Test:** Flip it! Were you right? Is this harder to predict than the ball?

3. The Water Tip

Look at the cup of water. Tilt it a little bit.

- **Predict:** When will the water spill?
- **Test:** Tilt it slowly over a sink. Watch your brain "know" exactly when to stop!

My Prediction Log

*

Write your response here

* I predicted the ball would go [Up/Down]. It went [Up/Down]. I predicted [Heads/Tails]. It was [Heads/Tails].

What We Learned

Question	My Answer
Which was easiest to predict?	(Usually the ball!)
Which was hardest?	(Usually the coin!)
