

Lab: Agent Counter

Goal

Use your Agent skills to count everything in your "Environment" (your room) and solve counting mysteries!

What You Need

- A notebook ("Detective Log")
- A pencil
- Your room or classroom

Steps

1. The Mission

You are an Agent Detective. Your mission: find out HOW MANY things are in your base. Remember the rule -- touch each thing and say one number!

2. The Hunt

Find and count these items in your room:

- **Lights:** ____
- **Doors:** ____
- **Shoes:** ____
- **Pillows:** ____
- **Books:** ____

3. The Challenge

Find something there is only **ONE** of. (Maybe a bed? A TV?) Find something there are **MORE THAN 10** of. (Books? Legos? Crayons?) Find something there are **ZERO** of. (Elephants? Volcanoes?)

4. The Cookie Mystery

Get 5 small objects (toys, crackers, anything). Put them in a line. Close your eyes. Ask a friend to take some away. Open your eyes. Count what is left. How many are MISSING? (Hint: 5 minus what you see = the missing ones!)

5. Report

Write your findings in the Detective Log below. A good detective always writes down the numbers!

My Detective Log

*

Write your response here

* The most surprising count was: ____ Something I found ZERO of: ____ In the Cookie Mystery, ____ were missing.

Item Name	My Count
Lights	
Doors	
Shoes	
Pillows	
Books	
Only ONE of	
More than TEN of	

What We Learned

Question	My Answer
Did you touch each thing while counting?	
What was the biggest number you found?	
How did you figure out the missing cookies?
