

Lab: Sensor Scavenger Hunt

Goal

To find hidden sensors in the real world.

What You Need

- A Sensor Log (Paper).
- A Pencil.
- Your Detective Eyes.

Steps

1. The Search

Walk around your house, school, or street. Look for machines that "know" things.

2. The Log

Write down what you find.

Object	What does it Sense?	How do you know?
Automatic Door	Motion (Movement)	It opens when I walk near it.
Street Light	Light (Day/Night)	It turns on when it gets dark.
iPad Screen	Touch (Finger)	It swipes when I touch it.
Car Bumper	Distance (Beep!)	It beeps when backing up.

What We Learned

We live in a world full of robots and sensors! They are watching, listening, and feeling all the time to help us.
