

Course — Module 03 — Think About It

1. Can a robot taste ice cream? (Chemical sensors exist, but can they enjoy it?)
2. Do robots need glasses? (They need focus lenses!).
3. Can a robot see in the dark? (Yes! Better than us).
4. If a robot's camera is dirty, what happens? (Perception fails).
5. How does an automatic door know you are there? (Motion sensor).
6. Can a car see the road? (Self-driving cars use Lidar and Cameras).
7. Do robots feel pain? (They have touch sensors, but it doesn't "hurt").
8. Why do smoke alarms make a loud noise? (To tell humans the sensor found smoke).
9. Can a robot hear a dog whistle? (Yes, if the microphone is good enough).
10. Which sensor is most important for a robot walking? (Balance/Gyroscope).
