

Lab: The Robot Maze

Goal

To navigate a robot through a maze using a plan.

What You Need

- Tape (Masking tape).
- A "Robot" (Friend).
- A Blindfold.

Steps

1. Build the Maze

Use tape on the floor to make a path. Put obstacles (Chairs) in the way. Mark an "X" for the Goal.

2. The Plan (Command List)

Look at the maze. Write down the steps:

- Forward 3 steps.
- Turn Left.
- Forward 5 steps.
- Stop.

3. The Run

Blindfold the Robot. Read your plan. Does the robot hit a wall? If yes, your plan had a bug! Fix it and try again.

My Maze Log

Plan Attempt	Did it work?
Try 1	Crash! Hit the chair on step 2.
Try 2	Modified Step 2 (Turn Right). Success!

What We Learned

Planning isn't just about knowing where to go. It's about knowing exactly HOW to get there, step by step, without hitting anything.
