

Lab: Build a Family Mobile

Goal

To visualize how connected your family is by building a hanging mobile.

What You Need

- A clothes hanger (or a stick).
- String or yarn.
- Paper and markers.
- Scissors and tape.

Steps

1. Draw the Parts

Cut out shapes from paper. Draw a picture of each family member on a shape. Don't forget pets! You can also add "Values" like "Love", "Fun", "Kindness".

2. Connect the Strings

Tape a string to each picture. Tie the strings to the hanger at different lengths and places.

3. Find Balance

Hold the hanger up. Does it tip to one side? Move the strings until it balances perfectly. This shows that everyone has a place!

discussion

- Touch one picture (make it swing).
- Watch how *all* the other pictures move too.
- This is how a system works. What you do affects everyone else!

What We Learned

We are balanced and connected. We move together!
