

Lab: The Body Map

Goal

To see how all the parts of the body connect.

What You Need

- Butcher paper or sidewalk chalk.
- Markers.
- A volunteer model.

Steps

1. The Trace

Lie down on the paper (or pavement). Have someone trace your outline with a marker/chalk. Stand up and look at "You"!

2. The Systems

Draw the parts inside.

- **Brain:** Draw a cloud in the head.
- **Heart:** Draw a heart in the chest.
- **Stomach:** Draw a bag in the belly.
- **Muscles:** Draw scribbles on the arms and legs.

3. The Connections

Draw lines to show how they help each other.

- Line from Brain to Leg ("Walk!").
- Line from Stomach to Muscles ("Here is energy!").

Discussion

- Could you run without a heart? (No).
- Could you think without a brain? (No).
- Every part is important for the System.

What We Learned

Our body is a team of organs working together 24/7 to keep us alive and playing.
