

Lab: Keep It Up

Goal

To work as a Team to keep a balloon in the air.

What You Need

- A balloon (inflated).
- A team (2+ people).

Steps

1. The Challenge

Keep the balloon off the floor. Use hands, feet, heads. Count how many taps you can get. "1, 2, 3..."

2. The Constraint

New Rule: You cannot touch the balloon twice in a row. You **MUST** pass it to someone else. This forces interaction.

3. The High Score

Try to beat your record. If you got 10, try for 15. Celebrate when you win!

Discussion

- Did you have to call out "I got it!"? (Communication).
- Did you crash into each other? (Coordination failure).
- Was it more fun to play alone or together?

What We Learned

A shared goal (Keep balloon up) creates a Team.
