

Lab: Build a Bot

Goal

To design a mechanical agent for a specific job.

What You Need

- Recycled materials (Boxes, cans, bottle caps).
- Glue/Tape.
- Markers.

Steps

1. The Function

What is your robot's job?

- "The Tickle Bot 3000."
- "The Sock Finder."
- "The Homework Helper."

2. The Features

Design the sensors and actuators.

- "It needs long arms to reach under the bed."
- "It needs a nose to smell dirty socks."

3. The Build

Put it together! Give it a name. Write a "User Manual" (Instructions).

Discussion

- Does your robot have a power switch?
- What happens if it breaks?
- Robots are tools we create to extend our abilities.

What We Learned

Robots are systems designed to solve problems.
