

Course — Module 06 — Think About It

1. Who found the first computer bug? (Grace Hopper).
2. Why is it called a "Patch"? (Like patching a hole in your jeans).
3. Can a computer fix itself? (Sometimes, but usually humans have to help).
4. Is it okay to make mistakes? (Yes! That's how we learn).
5. What is "Beta Testing"? (Letting people try the game to find bugs).
6. Why do games crash? (Too many bugs at once!).
7. How many lines of code are in a car? (Millions!).
8. Do you have bugs? (Bad habits?).
9. How do you debug a bad mood? (Sleep? Food? Hug?).
10. If you could update one thing about yourself, what would it be? (Version You 2.0).
