

Lab: Collective Intelligence Assessment

Objectives

Learning Goal: Diagnose your team's collective intelligence and design improvements.

Part 1: Collective Intelligence Factors (15 min)

Rate your team on the Woolley factors:

Factor	Score (1-5)	Evidence	Improvement
Social sensitivity			
Equal participation			
Cognitive diversity			
Communication quality			
Overall CI score			

Write your response here

Part 2: Distributed Cognition Map (10 min)

Knowledge Domain	Who Holds It	Documented?	Redundancy (backup person?)
		Y/N	

Write your response here

Part 3: Pathology Check (10 min)

Pathology	Present? (Y/N)	Evidence	Severity
Social loafing			
Groupthink			
Knowledge hiding			
Status hierarchy effects			
Coordination loss			

Write your response here

Part 4: Intervention Design (15 min)

Design one intervention for your team's most significant CI weakness:

Element	Design
Target weakness	
Intervention	
Expected outcome	
How to measure impact	
Timeline	

Write your response here

Summary

Metric	Value
Overall CI score	/5
Biggest CI strength	
Biggest CI weakness	
Priority intervention
