

Lab: Human-AI Collaboration Design

Objectives

Learning Goal: Design an effective human-AI collaboration for a specific organizational function.

Part 1: Decision Mapping (15 min)

Map decisions in your function by AI suitability:

Decision	Volume	Complexity	Ambiguity	AI Suitability	Current State
	H/M/L	H/M/L	H/M/L	Tool/Assist/Collab/ Auto	Manual/ Assisted?

Write your response here

Part 2: Collaboration Design (15 min)

For the best AI candidate:

Element	Design
Decision to delegate/share	
AI role	
Human role	
Escalation triggers	
Oversight mechanism	
Success metrics	

Write your response here

Part 3: Failure Mode Analysis (10 min)

Failure Scenario	Probability	Impact	Mitigation
AI gives wrong recommendation			
Human overrides correct AI			
Distribution shift (world changes)			
System outage			

Write your response here

Part 4: Change Management (10 min)

Stakeholder	Concern	Communication	Training Needed
Team members			
Managers			
Customers			

Write your response here

Summary

Finding	Detail
Best AI delegation candidate	
Biggest risk	
Key change management action
