

Practice Quiz: Digital Transformation — Module 08:

Planning

Name: ____ Date: ____

Part A: Multiple Choice

1. GE Digital's \$4B+ failure illustrates: A) Bad technology B) The transformation paradox — moving faster than the organization's capacity to learn and absorb change C) Poor strategy D) Market failure
 2. **Kotter's 8-step model** begins with: A) Hiring consultants B) Creating urgency — establishing why transformation is needed now C) Buying technology D) Reorganizing
 3. The **Three Horizons** framework helps by: A) Planning three years ahead B) Structuring digital investments across current business (H1), emerging (H2), and future options (H3) simultaneously C) Creating three plans D) Hiring three teams
 4. "Quick wins" in digital transformation are valuable because: A) They save money B) They build credibility, generate learning, and create organizational momentum for larger changes C) They're easy D) Executives like them
 5. The "frozen middle" resists transformation because: A) They're incompetent B) Middle managers' expertise and authority are most threatened by digital change, and they haven't been included in the vision C) They're old-fashioned D) They don't understand technology
 6. Digital transformation **sequencing** should prioritize: A) The most visible technology B) Building infrastructure and capability before scaling — data platforms before advanced analytics C) Everything at once D) The cheapest projects
 7. Most digital transformations fail because: A) Bad technology B) Insufficient attention to organizational change — culture, skills, processes, and leadership alignment C) Market conditions D) Lack of budget
-

Part B: Short Analysis

1. Design a 3-year digital transformation roadmap for a mid-size manufacturing company. Structure it across the Three Horizons, with specific sequencing rationale.
2. Your organization's previous digital transformation initiative failed due to employee resistance. Apply Kotter's 8-step model to design an improved change management approach for the next attempt.
3. Your CEO wants to "transform everything at once" with a \$10M investment. Using the GE Digital case and the transformation paradox concept, argue for a phased approach and design the first three phases.
