

Module 07: Communication — Social Media and Sharing

Learning Objectives

1. Understand that **Communication** combines Words, Pictures, and Emojis.
2. Learn about **Digital Footprints** (What you share stays forever).
3. Know that **Kindness** matters online just as much as offline.

Introduction: The Digital Billboard

Imagine if you wrote a note to your friend... But then you pasted it on a giant billboard. Everyone could see it. Grandma, your teacher, a stranger. That is **Social Media**. When you post, you are shouting to the world.

Key Concepts

1. The Post (Broadcasting)

In real life, we whisper or talk. Online, we "Post." A Post travels instantly to thousands of screens. Think before you post: "Is this true? Is this helpful? Is this kind?"

2. The Feedback (Likes and Comments)

Why do we like getting "Likes"? It gives our brain a happy chemical (Dopamine). But don't let Likes control you. You are awesome even if you get zero likes.

3. Cyberbullying (The Mean Screen)

It is easy to be mean when you can't see someone's face. But words on a screen still hurt. Rule: If you wouldn't say it to their face, don't type it.

Activities

Activity 1: The Emoji Decoder

Write a sentence using ONLY emojis. 😊🍔➡️😴 (I ate a burger and went to sleep). Can your parent guess what it means? Emojis are a new language of emotion.

Activity 2: The Toothpaste Tube

Take a tube of toothpaste. Squeeze all of it out onto a plate. Now... try to put it back in. You can't. That is like a Post. Once it is out, you can't take it back.

Summary

The Internet is a powerful microphone. Use your voice to spread kindness, not meanness.
