

Lab: Simon Says (Captain Says)

Goal

To see how the Brain sends orders to the Body, and what happens if the order isn't clear!

What You Need

- A group of friends or family.
- One leader ("Captain Brain").

Steps

1. The Good Captain

The leader stands in front. Leader says: "Captain Says... Touch your nose!" Everyone must touch their nose. Leader says: "Captain Says... Jump!" Everyone jumps.

2. The Trick

Leader says: "Clap your hands!" (Without saying "Captain Says"). If you clap, you are out! Why? Because the Captain didn't give the official order!

3. Be the Boss

Switch leaders. Now YOU are Captain Brain. Give commands to your friends' bodies.
"Captain Says... Dance like a chicken!"

My Captain Log

Command	Did the Body OBEY?	Why?
"Captain Says Jump"	Yes	Proper command
"Jump"	No	Captain didn't say so!
"Captain Says Sleep"	Yes	Brain is boss

What We Learned

Your brain is in charge. It has to pay attention to know when to act!
