

Module 03: Perception — The Family Feelers

Learning Objectives

1. Understand that we use **Senses** to know what is happening.
2. Learn about **Inner Senses** (Feelings, Hunger, Tiredness).
3. Know that paying attention helps us take care of each other.

Introduction: The Family Detectives

How do you know it's dinner time?

- You **Smell** pizza (Nose).
- You **Hear** cooking (Ears).
- You **Feel** hungry (Tummy). This is called **Perception**. Families need good perception to work well. If the baby is crying, we need to **Hear** it. If Mom looks sad, we need to **See** it.

Key Concepts

1. Outside Senses (The 5 Senses)

We use eyes, ears, nose, mouth, and hands to explore the world.

- "I see a messy room." -> Time to clean.
- "I hear rain." -> Time to stay inside.

2. Inside Senses (Interoception)

This is a big word for "Body Feelings".

- Is your heart beating fast? (Scared? Excited?).
- Is your tummy grumbling? (Hungry?).
- Are your eyes heavy? (Tired?). Listening to your body helps you know what you need.

3. Emotional Radar

Families have "Moods". Can you sense when Dad is stressed? Can you sense when your brother is happy? This is like a superpower. When we notice feelings, we can help.

Activities

Activity 1: The Blindfold Taste Test

Safety First: Only use yummy food! Blindfold a partner. Give them a small bite (Apple? Cheese? Cracker?). Ask: "What do you perceive?"

- Is it crunchy?
- Is it sweet?
- What is it?

Activity 2: The Emotion Charades

Write feelings on cards (Happy, Sad, Angry, Tired, Silly). Pick a card. Act it out using only your **Face** and **Body** (No talking!). Can your family guess the feeling? You are training your eyes to read emotions!

Summary

Perception is how we gather clues about our world and our family. By using our outside senses and our inside feelings, we become better at understanding what everyone needs.
