

# Module 06: Learning in Youtube

## Learning Objectives

1. Define **Learning** within the context of Youtube.
2. Analyze how Learning interacts with other components of the Active Inference framework.
3. Apply specific constraints of Youtube to the formal definition of Learning.

## Introduction

This module explores **Learning**. In the **Youtube** curriculum, we approach this topic with a focus on specific applications and theoretical depth appropriate for the audience. Learning is a critical component of the 8-part Active Inference spine, bridging the gap between [Previous Topic] and [Next Topic].

## Key Concepts

### 1. Learning as a Markov Blanket Boundary

How does Learning define the boundary between the agent and the environment?

### 2. Generative Models of Learning

What parameters involved in Learning must be optimized to minimize variational free energy?

### 3. Active Inference Dynamics

How does the process of Learning drive the perception-action loop?

## Applications

In Youtube, we see Learning manifest in: \* **Specific Example 1:** [Add domain-specific example here] \* **Specific Example 2:** [Add domain-specific example here]

## **Conclusion**

Understanding Learning allows us to better model complex adaptive systems. In the next module, we will expand on this foundation.
