

# Module 02: Agents — Captain Brain

## Learning Objectives

1. Understand that **YOU** are an Agent (the Boss of your body).
2. Learn that your Body is like a ship, and your Brain is the Captain.
3. Know that Agents have **Goals** (things they want to do).

## Introduction: Captain Brain and the Body Ship

Meet Captain Brain! She lives in the tall tower (your head). She sails a wonderful ship called **The Body**. The Body Ship sails on the big blue Ocean called **The World**.

Captain Brain has a map. She looks through her spyglass (Eyes). "Land ho! I see a yummy apple!" She yells to the crew: "Legs, walk! Arms, reach!" The Body Ship moves. Captain Brain gets the apple. She is a smart Agent!

## Key Concepts

### 1. Who is the Agent?

The Agent is **YOU**. Specifically, it's the part of you that thinks, chooses, and feels. Your body is your tool to move in the world.

### 2. The Goal

Every Agent has a **Goal**.

- **Captain Brain's Goal:** Stay safe and find food (and have fun!).
- **Your Goal:** Learn, play, and grow. Without a goal, the ship would just float in circles!

### 3. Action and Perception

- **Perception (Spyglass):** Seeing the world coming in.

- **Action (Steering):** Moving the body out into the world. Captain Brain needs BOTH to sail safely.

## Activities

### Activity 1: Simon Says (The Captain Speaks)

One person is "Captain Brain." Everyone else is a "Body Part."

- "Captain says... touch your toes!" (The Body obeys)
- "Captain says... blink your eyes!"
- "Jump!" (Uh oh! Captain didn't say. Don't move!) This shows how the brain sends orders to the body.

### Activity 2: The Goal Game

Stand on one side of the room. Place a toy on the other side. **Goal:** Get the toy without using your feet! **Plan:** Can you crawl? Roll? Hop? Your brain finds a way to reach the goal!

## Summary

You are a special Agent. Your Brain is the Captain, your Body is the Ship, and you sail through the World. Use your spyglass (senses) and steering wheel (actions) to reach your Goals!
