

Lab: The Mystery Box

Goal

To use your senses (Touch) to guess what is hidden, without using Sight (Eyes).

What You Need

- A cardboard box with a hole cut in the side (or just a bag/pillowcase).
- Secret objects (spoon, rock, cotton ball, toy car, orange).

Steps

1. The Setup

Ask a friend or parent to hide 3 objects in the box/bag. Don't look!

2. The Touch Test

Put your hand inside. Grab one object. Feel it.

- Is it hard or soft?
- Is it round or square?
- Is it cold or warm?
- Is it smooth or bumpy?

3. The Guess

Tell your brain the clues. "It is round. It has bumpy skin. It smells... citrusy?" **Guess:** "It is an orange!" Pull it out. Were you right?

What We Learned

Your brain can see with your hands! It takes the touch clues and builds a picture in your mind.
