

Module 01: Systems — The Kingdom of Numbers

Learning Objectives

1. Understand that Numbers live in a **System** (they have rules!).
2. Learn that every Number has a special **Place** (1, 2, 3...).
3. Know that a System helps us keep track of things.

Introduction: The Kingdom of Numbers

Welcome to the **Kingdom of Numbers**! It is a very tidy place.

- **King One** lives in the first castle.
- **Queen Two** lives next door.
- **Prince Three** lives after her.

In this Kingdom, nobody cuts in line! If you want to find **Five**, you just count past **Four**. This order is called a **System**. It helps everyone know where they belong.

Key Concepts

1. What is a System?

A System is a group of parts that work together.

- Your Body is a system.
- A Car is a system.
- **Math** is a system of Numbers!

2. Order (The Rules)

Imagine if numbers jumped around! "One, Five, Banana, Three!" That would be chaos. We need **Rules** (1, 2, 3, 4...) so we can predict what comes next.

3. Sets (Groups)

We can put things into groups called **Sets**.

- A Set of Red Apples.
- A Set of Blue Cars. Counting helps us know how big the set is.

Activities

Activity 1: The Number Line

Draw a long line on the floor with chalk (or tape). Write 1, 2, 3, 4, 5... all the way to 10. Jump on them in order! Can you jump backward? (10, 9, 8...) That is the System working in reverse!

Activity 2: Sorting Shapes

Get a pile of buttons or blocks. **System Rule:** "All ROUND things go here. All SQUARE things go there." You are organizing chaos into a System!

Summary

Numbers are safe and steady. They always stay in the same order. This Number System helps us count, measure, and understand the world without getting confused!
