

Module 05: Action — Family Action

Learning Objectives

1. Understand that **Action** is doing things (Moving, Helping, Playing).
2. Learn about **Chores** (Actions that help the system).
3. Know that **Play** is an important kind of action too!

Introduction: The Busy Beehive

A beehive is busy. Bees fly, clean, code, and dance. A happy family is busy too!

- Cooking dinner.
- Folding laundry.
- Building Legos. These are all **Actions**. We act to change the world. If the room is messy
-> Action: Clean -> The room is clean.

Key Concepts

1. Work (Helping the System)

We call this "Chores." Chores aren't punishments. They are how we keep our system running.

- Taking out trash = Keeps house smelling good.
- Setting table = Gets ready for fuel (Food). Everyone contributes because everyone lives here.

2. Play (Testing the System)

Kids learn by playing.

- Wrestling = Testing strength.
- Tag = Testing speed.
- Board Games = Testing rules. Play is serious work for a kid's brain!

3. Habits (Auto-Pilot)

Some actions we do without thinking.

- Putting on shoes.
- Brushing teeth.
- Saying "Thank You." Good habits make the day easier because the brain doesn't have to plan them every time.

Activities

Activity 1: The Clean-Up Song

Pick a fast song. See how many toys you can pick up before the song ends. Make action fun!

Turning a Chore into a Game changes how it feels.

Activity 2: Robot Chef

Help cook dinner. But pretend to be a robot listening to code.

- "Chef Bot, please stir the pot 10 times."
- "Chef Bot, please hand me the spoon." Precision matters in action!

Summary

Action is how we make our family life happen. By balancing work (chores) and play, and building good habits, we keep our hive humming happily.
